

Patent-Pending

EXO-FRAME™ Toothbrush

When it comes to security, no other toothbrush offers the same peace of mind as the Exo-Frame™ Toothbrush.

Specifically designed for the rigorous demands of the corrections and detention markets, the Exo-Frame Toothbrush has a patent-pending design that minimizes the risk of inmates using it as a weapon.

Unique Patent-Pending Structure: The Exo-Frame Toothbrush's design utilizes a series of small connectors that are stabilized with an alternating support system. The support system reduces the amount of continuous material that can be used as a weapon, but the toothbrush maintains structural integrity when used as intended. When manipulated, the Exo-Frame Toothbrush separates into smaller pieces and lowers the chance of weaponizing the toothbrush.

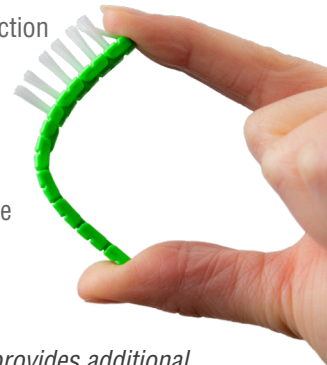

Risk-Reducing Design

- ▶ Small individual components that are difficult to weaponize
- ▶ Toothbrush support system loses structural integrity when manipulated
- ▶ Space between each connector limits the available material that could be turned into a weapon
- ▶ The short length of the Exo-Frame Toothbrush provides less material that can be manipulated

Familiar Functionality

- ▶ The bristles and semi-rigid handle function the same as a normal toothbrush
- ▶ The flexibility of the handle doesn't prevent its intended use
- ▶ The Exo-Frame Toothbrush material is durable enough for 2-4 weeks of use

The Exo-Frame Toothbrush provides additional security for your officers and inmates by minimizing the risk associated with traditional toothbrushes. It also comes at a much more attractive price point than most "security" toothbrushes on the market!

Product Information

ITEM NO.	CASE PACK	TUFTS	LENGTH
EXOBRUSH	144	20	3"

Individually sealed.
